

# Communal Chines Virus to Disastrous Pandemic in the Field Of Humanity, Economy and Environment

SAURABH CHEJARA

AIMS Institute of Management Studies.

**Abstract- Chinese virus (COVID-19) is an infectious disease caused by a new virus.**

*The disease causes respiratory illness (like the flu) with symptoms such as a cough, fever, and in more severe cases, difficulty breathing. You can protect yourself by washing your hands frequently, avoiding touching your face, and avoiding close contact (1 meter or 3 feet) with people who are unwell.*

## I. INTRODUCTION

## II. ELABORATIVE APPROACH

- China Virus a Pandemic

Endemic – An endemic is something that belongs to particular people or country, a constant presence in specific locations example Malaria is an endemic to parts of Africa.

Epidemic – An epidemic is something that belongs to a particular people or country and the number of those infected in that region is significantly higher than normal. For example, when Covid19 was limited to Wuhan China it was endemic.

Pandemic – A pandemic is an Epidemic which has a passport and can travel and speared in multiple countries and continents. Example COVID19.

- Chinese communism a curse to humanity  
With 14,87,870 confirmed cases and 88,630 deaths due to the outbreak of chines Virus the world is helpless and who other than the communist party of china is responsible for this massive and devastating outbreak which could have been controlled if the chines government could be trusted with the facts and figures.

Dr Li was the first whistleblower when he spoke publicly about this he was threatened by the Chines government and later accused of spreading false information, finally died fighting with the Chines virus himself.

Dr Fen gave the whistle to Dr li and later spoke publicly and is now missing.

<https://www.wionews.com/world/first-chinese-doctor-to-raise-alarm-over-coronavirus-missing-since-her-now-deleted-interview-290483>

If Communist party of China would have informed the world about this Pandemic in the binging of December when the whistleblowers were whistling hard to reach out to the masses, many life could have been saved.

Massive Role of World health organization in the spread of Chinese Virus

WHO director-general Tedros Adhanom Ghebreyesus is the person accountable for an epidemic converting to pandemic, by mid-January, Chinese doctors knew that COVID-19 was spreading between humans, but on January 14, the WHO stated that there was “no clear evidence of human-to-human transmission of the novel coronavirus.

<https://www.nationalreview.com/2020/04/coronavirus-pandemic-world-health-organization-failed/>

WHO’S unconditional love for China brought the world and the super powers to bite the dust.

- Effect on Economy

The rout seen in the financial markets because of the virus crisis has already wiped off equity wealth equaling 40 per cent of the estimated size of India’s gross domestic product (GDP) for the ongoing financial year.

- Corona Virus Changing Environment #Positive perspective

Corona has a major impact on the environment with dramatic reduction in CO2 levels, better air quality and animals roaming in the street freely, this is eye opening humans must learn to coexist.

We humans should keep this in mind that we do not own this planet but rather share it.

Environment is happy not on the plight of humans but because they got there spaces back.

### III. FINDINGS

- Environment and economy are inversely proportional.
- Communism promotes growth but lacks transparency.

- Communist government silently takes away write of speech.
- We do not own the Planet but share it.
- Communism is a form of dictatorship.
- In the world of cuts and wounds developing own manufacturing sector is very important, no one is reliable.
- Unlashing the potential of renewable energy is the need of the hour.
- Study and research in the field of micro biology should be promoted.
- Health sector was neglected and hence need major reforms in it.
- Big institutions like WHO should understand there crucial roll and treat everyone equally by avoiding partiality.
- Human can never control the environment; they must learn to coexist.
- Communism is curse to humanity hence the world should adopt democracy as power when concentrated shows the ugliest face.
- Biological weapons are the next big threat.
- Humans need a better and concrete framework for living.
- Leaders should be visionary, prudent and wise.

### ACKNOWLEDGMENT

I would like to show my grateful feeling to Prof. Prathamesh Nadkarni Sir, who once taught me. Prof. Prathamesh Nadkarni is a warm-hearted and discipline-keeping person, with whose supervision I accomplished this research paper in time. He is always patient to help me out with questions in terms of administration and rules. Thank you very much Sir!
