II. CONCEPTUAL BACKGROUND AND LITERATURE REVIEW

2.1 THEORETICAL BACKGROUND OF THE STUDY EMPLOYEE JOB SATISFACTION

Employee Job satisfaction is termed as the extent of liking or disliking their jobs. Employee satisfaction is one of the main aspects of growth of the organization which helps in increasing the productivity of the employees. If the employees are satisfied by their job then only they can work with full efforts.

Job satisfaction is the height of gratification employees feel about their job, which can shape their performance.

FACTORS AFFECTING EMPLOYEE JOB SATISFACTION:

1. WORKING CONDITION

The condition means the environment where the employees do their work the place where the employees work should be filled with positive thoughts. The environment should be created according to the requirements of the employees.

2. FINANCIAL REWARDS

The employees should be given proper rewards for their works so that they will be happy and will work more efficiently.

1. RELATIONSHIP WITH SUB-ORDINATES

The relationship of with the sub-ordinates is one of the factors which affects the employee job satisfaction if the relations are not good with the subordinates then the employee will not be satisfied by his work.

2. WORKLOAD:

The employees have more work load then they cannot do proper work which leads to dissatisfaction of the employees of the employee for their work, as well as if the work load is less, then the employees work more efficiently which leads to job satisfaction.

2.2 LITERATURE REVIEW WITH RESEARCH GAP

1. Ronan (1970): has studied the relative importance to eighteen job characteristics in relation to job and found that job security is not 25 Review of Related Literature and Studies important to salaried workers but it is important to both managerial and hour workers.
2. Prakasam (1976): has found that occupational level has some influence over the Satisfier's and dissatisfiers of employees. In higher level occupations, motivator factors act as satisfiers but in lower level occupations both motivators and hygienic Factors seem to act as satisfiers and dissatisfiers.
3. Pathak (1977): has found that the most important job characteristics sought by the high job satisfied group belonging to both the higher and the lower hierarchies and the low job satisfied group belonging to the lower hierarchy is the opportunity for advancement.
4. According to Mishra (1980): job satisfaction is a lacking accruing out of different Conditions within a job and outside the job.
5. Pleitner (1982): has pointed out that job satisfaction results from the degree of Correspondence between the individual 's expectations on the one hand and the Circumstances of his job situation on the other, as compared by the individual employee.
6. Harven and Renu (1984): have revealed that higher the age and the greater the number or dependents, the lesser will be the job satisfaction.
7. Mendhi (1985): has examined the need satisfaction and job attitudes of managers and observed that job dissatisfaction is highest for those public sector managers who have never changed their jobs.
8. Dattuar and Prasad (1986): have found that the personnel in private organization With the exception of those at the middle level are more satisfied than those working in public organizations.

9. Irene and Albert (1989): have indicated that sex and educational level cannot significantly account for differences in job satisfaction levels, whereas Occupation, age and length of service have a significant impact as some of the satisfaction dimensions.

10. Mira and Pestonjee (1990): their study to bank employees have observed that Satisfaction middle managers expressed the greatest degree of satisfaction followed by foremen and chiefs and then by workers.

III. RESEARCH DESIGN

3.1 STATEMENT OF THE PROBLEM

The study was performed to find out the level of Employees Job Satisfaction .one of the main roles of human resources departments is to ensure that employees are sufficiently satisfied with their jobs. typically, research has shown that satisfied employees or corporations are thought more productive.

On the other hand, if workers are dissatisfied with their jobs, they are thought to be less productive and more prone to absenteeism and turnover. So, HR departments need to measure employee Job satisfaction and examine the correlations between these three variable extraneous variables.

The survey, which is administered to the entire worker population, quantifies job satisfaction and employee. The general job satisfaction feedback will help hr in identifying the percentage of Satisfied employees and the percentage satisfied in the areas of compensation, benefits, training and supervisor relation.
